

## FIELD SCIENTISTS

Tetra Tech, Inc. is a world leader in environmental science and engineering, remediation, restoration and construction. We provide our clients with a full range of traditional and innovative services, that are delivered cost effectively, timely and in compliance with applicable regulations and requirements. We distinguish ourselves to our clients by proactively incorporating, **Client Service Quality®**, **Do It Right®**, and **Shared Vision®** principles through our work processes, operating procedures, and execution methods. We consistently meet or exceed client expectations. For projects small or large, we work together with our clients to achieve a shared vision of the project objectives: scope, budget, schedule, and level of quality.

We are seeking to hire up to 5 Entry Level Scientists to support our exciting large scale environmental project along the Kalamazoo River in the vicinity of Marshall, MI. Candidates who are interested in joining our dynamic field team should submit a resume to [eastern.region1@tetrattech.com](mailto:eastern.region1@tetrattech.com), Attention: Human Resources. Resumes should include hourly wage requirements. Pre-Employment Drug screening required.

The qualified candidates will have a Bachelor of Science degree in Environmental Science or related area with 0-5 years of experience. Primary responsibilities will be to support a team of on-site field scientists collecting data along the Kalamazoo River working nearly 100% of the time on and along the waterway regularly traveling on boats.

The chosen candidates will perform a variety of field work skills which may include sediment agitation by poling, sediment sampling, GPS survey techniques, and other similar tasks and will assist other scientists with related work activities. The chosen candidates should have good analytical and teamwork skills, be detail oriented and able to follow directions from team leaders and senior managers. Typical work days span 7:00AM to 7:00PM in a variety of physically demanding work and weather conditions.

The chosen candidates will be hired as a part time as needed employee. Tetra Tech anticipates the chosen candidates working for approximately 16 to 24 weeks total between April 15 and November 15, 2012. The chosen candidates will be required to drive to and from site on a daily basis using his or her own vehicle. Field work will be at a hazardous waste site, requiring medical clearance and OSHA Training. If the chosen candidates are not trained in the necessary areas Tetra Tech, Inc. will provide the training. The chosen candidates will also be required to attend on-site project health and safety trainings and new employee orientations provided by Tetra Tech's client.

Tetra Tech, Inc. is an Equal Opportunity Employer and we value workplace diversity. We invite resumes from all interested parties including women, minorities, veterans and person with disabilities.
