

Hydrogeologist I (Cleveland)

Job Req: 758 Posted: 12/6/2011 9:45:00 AM

New Opportunity

Brown and Caldwell is seeking candidates for an entry-level Geologist/Hydrogeologist position. This position may be filled in either our Cleveland, Columbus, or Cincinnati, Ohio offices. Successful candidates will work under the supervision of licensed Professional Geologists on a wide variety of environmental projects.

Responsibilities:

This position involves a high percentage of field work and some office responsibilities. Field work may include observation of drilling operations, including drilling of soil borings, installation of monitoring and groundwater recovery wells, collection and field classification of soil and rock samples, and conducting various field tests. Other field work may include groundwater and soil sampling, water-level measurements, aquifer testing, soil vapor sampling, borehole geophysical testing or other tasks. Office work may include field data reduction, including the preparation of boring logs, hydraulic conductivity calculations and computer entry of various field and analytical data. The successful candidate may also provide data interpretation, including preparation of data maps, contour maps and cross-sections and the preparation of brief sections of report text. Knowledge or interest in statistics preferred.

Req'd Skills: Position Requirements:

- B.S. in Geology or Hydrogeology
- Detailed understanding of geologic principles and general awareness of groundwater flow and environmental concepts
- Highly organized, reliable and able to work well with others
- Good communication skills
- Willingness for frequent travel and to work in a rigorous field setting
- Able to perform physical work while wearing an air purifying respirator
- OSHA training preferred

Est. Hrs/Wk: 40
