

Subject: Benefits for your students from NGWA

April 22, 2011

The academic year will soon be coming to a close, and that means students searching for summer internships and new graduates looking for jobs in the groundwater industry. NGWA's [career center](#) is a great tool for narrowing the search to positions with reputable ground water employers. Please remind your students and recent graduates to explore our career center and its [job board](#), it is free to search for members and nonmembers.

We are currently working on the internship board in order to provide a variety of quality positions to our student members, as we know internships are essential to gaining vital work experience and can lead to full-time positions after graduation. If you are aware of any open positions that you would like to post, please do so [here](#). We want to make our career center as helpful as possible to both our student and professional members.

Let me know if you have any comments or questions, I'd be happy to help. Don't forget you can also stay in touch by following us on [Facebook](#) and [Twitter](#)!
